Prices on Field Grass Seeds are very reasonable, quality is very fine.

ARTICHOKES

The New Large Jerusalem Variety, producing from 300 to 600 bushels per acre. An excellent food for hogs, cattle, sheep and milch cows; they are for the production of milk equal if not superior to bran. But their greatest value is food for hogs. Even the labor of feeding is avoided, as the hogs will help themselves if allowed to do so. We consider them the cheapest and healthiest hog food possible to raise, and find that where brood sows have free access to Artichokes they and their pigs invariably do well. Hogs will not only grow, but fatten on them.

Price, $\frac{1}{4}$ bushel, 60c. Price per bushel, 50 pounds, \$2.00.

Two bushels plant an acre.

Extra Early Evergreen

COUNTRY GENTLEMAN.

This variety is often called the "shoe peg" corn, owing to the arrangement of the crowded kernels which are long and very sweet. The ears average nine inches in length and are borne from two to five and sometimes six on each stalk. Of the finest quality. If you try this variety you will like it. Price: Pkt., 5c; $\frac{1}{2}$ lb., 20c; lb., 35c; 3 lbs., \$1.00.

**SWEET OR SUGAR CO.
GOLDEN BANTAM.**

Is more firmly fixed in popular favor because of its extreme early character, vigorous growth and surpassing delicious flavor. The stalks are dwarf and sturdy in habit, growing to a height of four feet. They bear 3 to 5 good ears five to seven inches in length, have eight rows of broad, yellow grain, extending to the extreme tip. Market gardeners find Golden Bantam their most profitable variety throughout the season (from successive plantings). It is as distinct in flavor from that of white varieties as in color. Pkt., 6c; $\frac{1}{2}$ lb., 20c; lb., 35c.

PEEP O'DAY.

Originating in the far north, this variety is therefore extremely early in maturing. Besides this important feature it is a "Sweet Corn" in the true sense of the word, being remarkably sweet and tender. The stalks grow about four and one-half feet high, and are usually very prolific, producing from two to five ears each, which measure about five inches in length and are well filled. Price: $\frac{1}{2}$ lb., 20c; lb., 35c.

MAMMOTH WHITE CORY.

The largest and best extra early sweet corn. The stalks are no longer than those of the "White Cob Cory," but each stalk furnishes two or more large, fine shaped ears. An early sort. The beauty and quality of this variety gave it ready sale, even when the market is overstocked. Price: $\frac{1}{2}$ lb., 20c; lb., 35c.

In introducing the NEW VARIETY OF ROASTING EAR CORN, we do not hesitate to say it is one of the very earliest now grown, and you can get corn for your table in about 60 days from planting. While this corn is not a true sweet corn, you can hardly tell the difference. It is far ahead of the Early Adams Varieties. The ears are from 8 to 10 inches long and have two to three ears to the stalk. The picture here shown is a true photograph of an ideal ear of this GRAND NEW CORN. We have only a limited amount of this seed corn for sale this season, so send us your order at once. Price per 4 oz., 10c; 1 lb., 20c; 2 lbs., 35c. Postpaid. Price per bushel on application.

Musk Melons - Cantaloupes

Grow "Honey Dew" Melons

The Sweetest Melon Ever Grown

First introduced in the West in 1915, and is fast becoming a favorite.

The rind is a dull white when ripe. Part of the melons show slight checks in the rind like a tendency to net. This appears when the melon is ready to pick.

The size runs six to seven inches in diameter from top to bottom and eight inches in length. The matured melons are practically all the same.

The flesh is a rich green and very sweet. The melon is the best of all shippers and will be practically no loss from spoiled melons in shipping.

I recommend this melon to market growers.

The vines are vigorous and set six to ten melons to the hill and if proper care is taken to ship only ripe melons a fine market can be established.

My supply of seed is strictly right and grown from carefully selected stock seeds.

Price, per pkt., 5c; oz., 20c; lb., \$2.00.

GOLDEN MEATED HONEY DEW.

Habits and growth same as above, only that the flesh is yellow, very sweet. Pkt., 10c; oz., 20c; lb., \$3.00.

ROCKY FORD.

GENUINE ROCKY FORD.

This new musk melon is similar to the oval strain of Netted Gem. The strain here offered originated with the melon growers in the vicinity of Rocky Ford, Colorado, who have shipped this melon from that distant Western point to Eastern markets. The melons grown by them are so fine in quality as to outsell all others, and the demand for such melons has been far beyond the supply. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

BURRELL'S GEM.

It has a thin, tough rind and is closely netted. The meat is of a reddish orange, very thick, fine grained and spicy. The seed cavity is unusually small. All these points combined make it a first class melon both for its good eating and fine shipping qualities. ½ oz., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

JENNY LIND.

The earliest of the green fleshed sorts, and one of the sweetest. It is of flattened form, small size. ¼ oz., 5c; oz., 10c; ½ lb., 25c; lb., \$1.00.

EMERALD GEM.

Excellent quality, is of medium size; skin ribbed, though perfectly smooth and of deep emerald green color. Flesh salmon color, thick, very juicy, flavor sweet and luscious. Melons mature extremely early. ½ oz., 5c; oz., 10c; ¼ lb., 25c; lb., \$1.00.

HACKENSACK.

Green flesh. A large, round variety, flattened at both ends and well ribbed. ½ oz., 5c; oz., 10c; ¼ lb., 25c; lb., \$1.00.

GENUINE BURRELL'S GEM.

Musk Melons (Continued)

JERRY LIND.

OSAGE, OR MILLER'S CREAM.

A remarkably fine variety, and a very profitable sort for market gardeners, as it is fully established as a standard sort and will ever remain so. It is of medium size, oval in form, dark green in color, handsomely netted and slightly ribbed. The flesh is extremely and uniformly thick, of firm texture, rich salmon in color; highly flavored and delicious to the rind. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

BANANA.

An entirely distinct variety, bearing long, slender, banana-like fruit. Flesh deep salmon color, thick and of good quality. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

MONTREAL MARKET.

The Famous Forcing Musk Melon.

Giant, showy melons much used for exhibition purposes, weighing on an average 10 pounds and measuring 8 to 9 inches in diameter. They often, however, weigh 20 pounds each.

It is justly celebrated not only on account of its large size, but also its delicious melting flavor. They are of the green nutmeg type, almost round, heavily netted; deeply and regularly ribbed with thick, luscious flesh. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

MANGO MELON, OR VINE PEACH.

About the size of an orange, sometimes called "Orange Melon." Fine for sweet pickles or preserves. Pkt., 5c; oz., 15c.

GARDEN LEMON.

Similar in size and habit of growth to Mango Melon, but with sharper flavor. Pkt., 5c; oz., 15c.

Long, oval shaped, skin very thin and delicate; flesh extremely tender, rich and sweet. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 75c.

PAUL ROSE.

A new sort, possessing several characteristics of the Osage; form slightly oblong, distinctly ribbed, slightly netted; color, when unripe a deep green, turning a golden tint; flesh salmon, and so thick as to show an unusually small seed cavity; flavor like Osage. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 20c; lb., 75c.

TIP TOP.

A new melon of recent introduction and very deserving. All who have tried it have pronounced it one of the finest. Flesh yellow and sweet. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

A new melon with many good qualities. Its size is about that of the popular Rocky Ford, which appeals to the shipper, which the delicate flavor of the thick, red flesh should commend it to every private gardener. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; lb., \$1.00.

WATERMELON SEED OF QUALITY

Sweetest Watermelon in the world; large, oblong shape. Skin dark green; rind very thin and brittle; fully ripe melon will always split ahead of the knife. Flesh bright scarlet, sugary and melting in the highest degree. Heart is broad and solid. This melon is not a good shipper, but is the finest table variety for home market. We have the true genuine stock, which is very hard to obtain. Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; lb., 75c, post-paid.

GENUINE TOM WATSON WATER MELON

WE HAVE THE BEST SEED YOU CAN GET.

No melon ever offered commands so high a price as the Genuine Tom Watson in the leading markets of the North. It finds a ready sale at from \$10 to \$25 per car more than other varieties; while less attractive kinds sit around on the tracks unsold. We make a specialty of growing this melon for seed purposes; and have a true strain of the Original TOM WATSON. The melons from which we take our seed weigh from twenty to forty pounds or more. The true type of this melon seed is buff or a very light brown. A great many seed houses are sending out white seeds for the true strain of Tom Watson. This shows a degeneration of the melon and will not give you the results desired. Plant the true strain. We have it. Price, pkg., 5c; oz., 10c; $\frac{1}{4}$ lb., 25c; 1 lb., 75c.

ALABAMA SWEET.

A large, dark-skinned melon, flesh red. One of the first to come into the market, being early and of strong growth and will bear longer than any other melon. It is a light seeded melon and first-class for shipping. Good size, though not ungainly. Largely raised in Texas, where it brings extra prices. Tomatoes

Bonny Best Tomato

For a really good extra early tomato, this new prolific variety is a wonder and the market gardeners or shippers who plant it are bound to get top prices of the earliest market. It's a wonder for extra earliness, smoothness, and heavy bearing; immensely prolific, combined with vigorous growing qualities. Begins to "set" fruit from the first blooms, and as the foliage is rather light and open it lets the sun in to color and ripen the fruit quickly. Our illustration from a photograph shows about one-third its size and its extremely heavy bearing qualities. Begins with the earliest and keeps right along bearing. Fruits are from 2¼ to 3 inches in diameter. Its color is an intense glowing scarlet, and ripens evenly. A splendid shipper and of very fine eating quality for home garden use. Its smoothness of skin and regularity are exceptional for an extra early variety. If you are a truck grower you cannot afford to miss planting it; if you are a home gardener you need it for earliest use. We have seen as many as 34 good sized, smooth, ripe tomatoes on a single plant at one time. Immensely prolific and beyond question the most desirable extra early tomato offered for sale. It represents years of closest and most careful work in seed selection and plant breeding. Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.00; lb., \$3.50, postpaid.

John Baer Tomato

One of the earliest and best Tomatoes now produced. This Tomato is well adapted to main crop planting. It matures so quickly that it ranks first in the market gardener's field for early market purposes. The form is perfect, uniform, large and attractive. The flesh is very firm. A robust grower, with short joints setting its clusters closer together than most varieties of early tomatoes. Our illustration shows one branch of clusters, which hang profusely over the vines. They are a brilliant deep red color, no core, almost free from seed and very fine flavored. Fruit ripens evenly and is a good shipper. Our seed is produced by one of the largest seed growers in the world, and is true to name and type. Price. pkt., 5c; oz., 35c; ¼ lb., \$1.25; lb., \$5.00.

SEED CORN

of the

BEST QUALITY KANSAS GROWN.

At no time in the history of American agriculture has it been so necessary to secure maximum return from farming as at the present, and there is no crop the farmer raises that will give increased returns in proportion to care in seed selection as CORN.

One grain of corn will produce MORE CORN than a similar quantity of any other cereal will produce of its kind. PLANT GOOD SEED. We have it, at reasonable prices, selected and graded seed, tips and butts off.

We grow and contract for our corn with the best corn growers in this state and they have received First Prize Money at the Kansas State Fair and other Corn Exhibits. Our prices are reasonable and we hope to get your order early. Let us book it NOW and we will ship when you are ready for it.

SPECIAL:—If you expect to buy seed corn this year, let us know. We will send you, FREE of charge, SAMPLES of any kinds you want, and the corn will be just as the samples are we send you, or you ship it back to us and we will refund your MONEY. We offer you as follows:

DIAMOND JOE'S BIG WHITE (EARLY).

was brought into our home county (Shawnee), three years ago from Iowa, and it has become thoroughly acclimated with our climate conditions and our crop this year will average 80 bushels per acre, and everywhere tried and tested, north, south, east and west, it has proved a wonderful success, producing enormous yields and maturing as early as the earliest varieties of big white corn.

DESCRIPTION:—Stalks are large, strong and robust, growing to a height of 8 to 12 feet, dependent upon the land; a great drought resister; broad blades and many of them; ears 8 to 12 inches long and 7 to 8 inches in circumference; 16 to 20 rows, deep grains, solidly set on a medium size cob; cobs white, matures in about 100 days; every stalk producing one to three good ears. It is not only adapted to good, strong ground, but will do better and return large yields on old, poor, thin or hill ground than any other variety in existence. In short, it is the embodiment of all the good qualities contained in all the best varieties. It's the sure thing—all we claim for it. Our seed stock of this corn is exceptionally fine this year (extra choice), having been grown from absolutely pure seed stock, and we have made a selection of the most choice ears, and hope to be able to fill every order promptly that comes to us this year.

DIAMOND JOE'S BIG WHITE.

BOONE COUNTY WHITE.

DESCRIPTION—Ears well filled out at both ends, cylindrical, 9 to 11 inches long, averaging 20 rows, some 18 to 22. Grain very deep, a little rough. Cobs white, of medium size. Boone County is a show corn and has carried off many premiums offered at corn contests—state and county fairs. Matures in 110 to 120 days. Write for samples and prices.

IOWA SILVER MINE.

DESCRIPTION—Silver Mine is deep grained pure white, rough-topped with a small white cob. Ears 9 to 12 inches long, 16 to 20 rows of pure white kernels, solidly set on ears well filled at butt and tip. The small cob dries out rapidly and can be marketed early. This corn is a drouth resister. Frequently bearing two ears weighing 1 and 1½ pounds each. Matures in 100 days.

IMPROVED ST. CHARLES WHITE—Red Cob.

DESCRIPTION—Pure white corn with red cob, ears are large, moderately rough, deep green. Stalks grow very leafy and heavy, and will produce enormous ears of corn. Matures in 100 days.

MUSHRUSH OR SHAWNEE WHITE).

One of the largest-eared white corn grown, grains dented, broad and fairly smooth, ears 10 to 14 inches long, matures 110 to 120 days. A drouth resister, well adapted to upland, as well as bottom.

We Appreciate Your Order, Large or Small

REID'S YELLOW DENT.

DESCRIPTION—Color deep yellow, with lighter cap. Grain very deep, closely packed; butts and tips almost entirely covered over. Slightly rough, with grains dented on top. Leaves and stalks of Reid's Yellow Dent make the finest ensilage and fodder. Matures in about 90 days. Write for prices and samples.

IMPROVED LEAMING.

A corn of very rich, deep-golden color; slightly tapering ear, well filled at the butt and tip. The ears range from 8 to 12 inches long and from 7 to 8 inches in circumference, weighing from 12 to 17 ounces each. Each ear has from 16 to 24 rows of kernels, which are broad, deep and thick, set on a red cob of medium size. Mature in about 90 days.

HILDRETH YELLOW DENT.

This corn is a very large growing variety. The ear is large and well rounded at butt and tip. The kernels are incline to be small, but are very deep. Indentation medium rough; color deep golden yellow. Matures in 10 days.

IOWA GOLD MINE.

A handsome early corn, ripening a few days after our improved Leaming; ears are of good size, even and uniform in shape; cob small with very deep grains of bright golden color. Matures in 100 days.

**GOLDEN BEAUTY.**

The ears are of perfect shape, with from ten to fourteen straight rows of bright golden yellow grains, remarkable in size and filled out completely to the extreme end of the cob. The richness of color and fine quality of grain make it vastly superior for grinding and feeding. Matures in 100 days. Write for prices and samples.

**BLOODY BUTCHER (White Cap).**

This corn is much sought after by the farmer who finds it necessary to replant his corn in June or July. It is a good yielder, making as high as 65 bushels to the acre.

DESCRIPTION—Color deep cherry-red with white cap, generally 14 rows of pure red white cap corn on a small cob. Long, slender ears, 10 to 12 inches. Stalks medium height, fairly heavy, grains always dented and sometimes rough. Matures in about 80 days.

**CALICO OR STRAWBERRY CORN.**

Old Fashioned Red, White and Yellow.

DESCRIPTION—This peculiarly colored corn is obtained by breeding together strong, vigorous red, white and yellow types of rich feeding stock, producing a kernel showing stripes of the three colors. Ears large, deep grain and small cob, 9 to 12 inches in length, and 7 to 8 inches in circumference. Matures in about 90 days.

**IMPROVED INDIAN SQUAW CORN.**

Holds more records for wonderful performances under difficult conditions than any corn ever grown.

It has an extremely early variety, maturing in 85 days. Perhaps the most wonderful quality of this corn is its power to resist drouth, and it does equally as well in wet seasons. Ears large, 10 to 12 inches, and two on every stalk. The kernels are of different colors. Blue pins and red and white, giving the ears a curious, beautiful mottled appearance. Order early. We always sell out.

We Have the BEST SEED CORN Grown

**SEMI-FLINT SQUAW CORN.**

**SQUAW CORN.**

This is the old fashioned Flint Corn that is known by every one the country over as Squaw Corn. Matures in 75 days, has two to four large ears to the stalk, kernels blue and white, especially recommended where an early corn is needed for early stock feeding and for ensilage purposes. It can't be beat. Give this corn a trial and you will always have corn.

TOWNSENDS

75 Day

Yellow Dent Corn

This grand NEW variety of **EXTRA EARLY YELLOW DENT CORN** was first introduced in this locality (Shawnee Co., Kansas) by Mr. A. Townsend, one of our leading farmers and stockmen, and is fast becoming a favorite corn where early feed is required. The ears are of handsome appearance, bearing 12 to 14 rows of bright, rich yellow, smooth wedge-shaped kernels, packed closely on a small red cob, from butt to tip. The ears average 8 inches in length and are borne usually two on a stalk. Townsend's Extra Early Yellow Dent is without an equal in the fields of early corn.

Seed Potatoes of Quality

THE EARLY OHIO is the leading potato in the West and is more generally planted than any other variety. It seems to be especially adapted for this section. Red River Early Ohios have given more general satisfaction to our customers than any other potato. Ready for market very early, heavy yielders, good keepers, and one of the finest table varieties. We guarantee our stock to be genuine Northern Red River.

No. 2 Medium Size Red River Ohio will be about 25c per bushel less than No. 1.

NOTE—Send us your order at once, and if our market declines in price we will refund the difference in money, or put in that many more potatoes. In any event we will send you full value for your money.

POTATOES---Continued**EARLY SIX WEEKS**

This remarkably early Potato is especially valuable to the market gardener, and for those with a small garden who grow for extra early Potatoes only. It is ready for use ten days ahead of the Early Ohio; of excellent quality; abundant bearers and a good keeper. In shape it is identical with the Early Ohio; color much lighter; skin very smooth, with few very shallow eyes. This should be planted largely and you will be well repaid with results. South Dakota sand land.

**BLISS TRIUMPH POTATO.**

This is positively one of the earliest seed potatoes grown. Produces from 150 to 300 bushels of handsome Potatoes per acre any and everywhere. Splendid for all states, especially South. Stock unusually fine this year, though scarce. It's an extremely popular early variety, Red River grower.

**GREEN MOUNTAIN.**

The illustration above shows exactly how it looks. The tubers run rather large with a thick skin, heavily netted, cream color rather than white. The color and the thick netting indicate fine cooking qualities. A Green Mountain is hard to beat for an eating potato, as it always cooks up dry and mealy and has a peculiarly fine flavor. The eyes are rather deep as compared with the Rural type varieties, but the quality is most excellent and then it is a very strong, vigorous grower and heavy yielder. Red River grown.

**PURE EARLY ROSE.**

The good old favorite, which continues in great popularity. A prolific yielder, sure cropper and popular market Potato. Every farmer and gardener knows the good Early Rose and nothing more need to be said in its favor. The seed we offer is the purest and best that can be put on the market. Red River grown.

**IRISH COBBLER.**

It is a most excellent extra early variety, maturing good size tubers 7 weeks from the time of planting. It has also the remarkable characteristics of producing very few, if any, small Potatoes, all the tubers being of remarkable size. The vines make short, upright growth, so that the hills may be only a short distance apart. Skin is clear and smooth, flesh is pure white and of excellent quality, always cooking very mealy. Red River grown.

SWEET POTATOES

THE NANCY HALL.

This Potato was first introduced by us to our Northern growers 30 years ago, and is now rapidly taking the lead over all other varieties. The Potato in color is a very pale pink (fresh color). The meat is a rich, sweet, golden yellow when cooked, and is one of the best keepers now grown. Prices upon application.

What You Can Do With One Doe.

This table is to try and show what can be accomplished with one doe in thirteen months, taking five as an average litter, which is a low estimate.

Jan.	Breed doe.	The two does in first litter will be ready to breed in August. They will kindle and raise five rabbits a piece, and in February their young will be old enough to breed.
Feb.	Kindle and raise 5 rabbits.	
Mar.	2 does in this litter	
Apr.		
May	Breed doe.	The three does from the second litter will be ready to breed in December. They will kindle and raise five rabbits a piece, making fifteen rabbits.
June.	Kindle and raise 5 rabbits.	
July	3 does in this litter	
Aug.		
Sept.	Breed doe.	Now, you will have the original old doe and 5 rabbits 12 mo. old. 5 rabbits 8 mo. old. 5 rabbits 4 mo. old. 5 rabbits 1 day old. All from the original doe.
Oct.	Kindle and raise 5 rabbits.	
Nov.	2 does in this litter	
Dec.		
Jan.	Kindle and raise 5 rabbits.	And from the two young does of the first litter you would have ten rabbits five months old.
Feb.	Breed doe.	And from the three young does of the second litter you would have fifteen rabbits one month old.
	3 does in this litter	

A rabbit will gain about one pound a month until it is seven months old. In thirteen months, with one doe you will have raised about 250 pounds of as fine a meat as is produced any where, and at twenty cents a pound live weight, will bring you \$50.00. CAN YOU BEAT IT.
